It is no exageration when we state that the year, just closed, was the most successful in the history of the school. The average attendance lead all previous years, while upright conduct on the part of the students could not have been better. The fact is that The Lindsey-Wilson has succeeded in gaining a patronage from that class of people who desire advancement, mentally, morally and physically and in all these lines of useful work the development can not be other than gratifying to al the students and their parents.

From the beginning to the close of the year there was no rowdyism manifested on the part of any student, and up to the mark of hard work seemed to be the purpose of all. That this community and entire section of Southern Kentucky feels a great pride in The -Lindsey-Wilson, that they thoroughly appreciate the ability and worth of Prof's Neilson and Moss as leaders and directors, and that the entire corps of by Stanley 4.
